

TEMPERATURE SENSOR TEP NI1000-LG

TEP NI1000-LG temperature sensor is designed for automatic HVAC systems to detect radiator temperatures.

Temperature is detected by a Ni1000-LG element with a nominal resistance of 1000 $\Omega/0$ °C.

Housing is made of heat-resistant plastic.

The screw cover and terminal blocks tilted to 45° make an easy installation.

Sensor is mounted on the pipe by means of an adjustable tie.
